ACT NOW STOP VIOLENCE AGAINST WOMEN

Please write your congress person in Washington D. C. in both the Senate and the House and demand that they pass the Violence Against Women Act as it is written. All women must be protected in this country. Violence against women is not a negotiable issue. The Indian woman living on reservations in Michigan, Oklahoma, Wisconsin or Alaska should be given the same protection as a woman living in Ohio and Mississippi. We should not make a distinction in the woman that we protect under our Constitution. The women brought to our shores for the sex trade or marriage should also be given equal protection under our laws. No woman should be excluded from our protection including illegal aliens. The right to life liberty and the pursuit of happiness is a protection that more than 200 million men and women fought for, were maimed for, and died for in this country and abroad. Women helped to fight a virulent evil in Europe in the 1940's now we must galvanize ourselves to fight this same evilness in this country.

Please take the time out of your busy schedule to attend to this matter. I realize this is an imposing issue and some of you may think your voice does not count. You do count. It does not matter if you are a worker at McDonald's or an engineer at Ford Motor Company, you are important and violence against women is an issue that is both important to you and to me. Women must deal with this issue because violence against women is the defining issue of our times. Our sons and daughter shall ask history, "Why did the women not act in 2012, when their rights were being violated by Congress?" There is no other issue more important than violence against women. What is more important than life? If you want to be respected then you must exercise your power as a citizen and direct Congress to do as you wish. There is nothing more important than the safety and welfare of our female citizens. Each time a woman is murdered in this country at least 27 people are affected by this murder, and often the murdered woman leaves behind at least one child. This child will grow up living a miserable life because of the murder of his or her mother. Yes, the child will grow up go to college, get a job, and marry but a murdered mother is never forgotten. One flashback or thought can bring these children to tears no matter their age. There is a growing population of children of murdered women. Do not sit at home and think you are powerless. You must overcome your lack of self esteem and strike back. Congress is not an indomitable foe. One concerted action by the women of this country and we can take Congress. There is not an entity in this country that women cannot overwhelm.

You are not powerless just because you are a woman and cannot match a man in physical strength. You have mental power and determination that you can direct into a force that no one can withstand. Be willful and tenacious and write Congress directing them to pass the Violence Against Women Act as it is written with no negotiation. All women must be included in the protection under this act. Women do not have time for the posturing in Congress. We are trying to move on with our lives so that we can leave behind strong and healthy children who will remember us with pride.

Go to your husbands, sons, uncles, fathers, grandfathers and male cousins and tell them to write Congress on your behalf to insure the protection of you and every female member in your family. Men too are victims of violence against women. As you read the series of "Do This In Remembrance of Me" you will see more and more men are being affected by violence against women. The letter to your congressman can be short and sweet: It should read, "My name is _____. I live in your state and I am a registered voter. I am writing to request that you pass the Violence Against Women Act as it is written. If you do not pass this act right away as it is written, the next time you run for reelection the women in this state shall remove you from office and I shall run for your seat instead."

In 2000	3,169 women were reported murdered.
In 2001	3,314 women were reported murdered.
In 2002	3,316 women were reported murdered.
In 2003	3,251 women were reported murdered
In 2004	3,137 women were reported murdered.
In 2005	3,155 women were reported murdered.
In 2006	3,156 women were reported murdered
In 2007	3,177 women were reported murdered
In 2008	3,158 women were reported murdered
Total	28,833

The figures do not include the **827,787** women raped in this country since 2000 to 2009. Nor the **87,294** attempted female rape victims who were brutally beaten (only preliminary stat available for 2008-09). So we have approximately 1 million cases of American women were either raped and murdered or raped and assaulted in the last decade.

Below are the names of the women known to have been murdered in the United States since the year 2000. Possible duplication when martial status was unknown. The shaded portion indicates individuals murdered at the same time or murdered by the same time over a period of years.

There are more than seventy-six male names on the above list under the age of 16, look at their ages. Never again say that a man will not murder his children. The women and children were strangled stabbed, mutilated, doused with gasoline and set afire, poisoned, shot immolated, invicerated, etc because a male was angry at the circumstances of his life. The only conclusion we want you to draw from this list is that men will murder their children and the children of other men and men will kill to avoid child support or to stop child support payments.

Excerpt from A Wake Up Call For The Abused Woman

If you do not want your name or your mother's name or daughter's name or sister's name or your grandmother's name to appear in a book like this then you should spend more time learning how men murder women, and how your husband's girlfriend can murder you.

You need to learn about all the tricks men use to lure women to their deaths.

The Institute spent 12 years assembling information that can be life saving. Any one of our books will enlighten you and give you that needed information that may save your life.

Stop walking around thinking you are safe because you live in a safe neighborhood, your husband has a job, you go to a nice church. Nothing precludes murder. Social standing, mode of dress, years of marriage, employment etc., precludes murder. Your girlfriend's husband can kill you. The pastor can murder you or your daughter. The garbage man can kill you. Your husband's girlfriend can kill you and your children. Nothing precludes murder therefore you need to be armed with as much knowledge as you can so you can protect yourself and the other women and children in your family.

Do not be afraid of knowledge by sticking your head in the sand. There are monsters living all around us and we must be strong and resist them. Fighting is part of life. Let no man take your life without a battle.

Why We Need More Rescue and Police Personnel

Police officers are essential to the protection of the family and the well being of society. May 26 2010 The Deseret News reported that nearly 185,000 murders in the U.S. since 1980 remain unsolved. The headline was the result of a Scripp study conducted.

The news article said, Every year in America, 6,000 killers get away with murder. The percentage of homicides that go unsolved in the U.S. has risen alarmingly. Scripps Howard News Service and Ohio University found nearly one-third of American adults personally know the victim of a homicide and at least one in nine personally knew the victim of an unsolved homicide. Police solved only 35 percent of the murders in Chicago in 2008, 22 percent in New Orleans and just 21 percent in Detroit. Yet authorities solved 75 percent of the killings that same year in Philadelphia, 92 percent in Denver and 94 percent in San Diego. "We've concluded that the major factor is the amount of resources police departments place on homicide clearances and the priority they give to homicide clearances." said University of Maryland criminologist Charles Wellford, who led a landmark study into how police can improve murder investigations. City police in Flint, Mich., and Dayton, Ohio, suffered the worst decline in clearance rates among major police departments. The average clearance rate fell more than 30 percent since the 1990s in both cities. Both cities suffered a substantial decline in manpower, the result of rapidly declining tax bases in their communities following severe cuts in manufacturing jobs. Since 1990, Flint dropped from 330 sworn officers to 185, while Dayton's force went from more than 500 to 394.

Consequently if your police department has the manpower and the equipment it needs then your city will get a better clearance rate on murders and other crimes; if not the likelihood that crime will increase in poorly manned police precincts grows dramatically. Well equipped and well manned police and fire departments is an absolute necessity if we are to remain a well organized society. Crime rests on three factors, education, employment and manpower. Education reduces crime. Employment reduces crime and manpower on the street reduces crime. When either one of these factors change drastically, crime increases and people get away with murder.
